DETAILED ACTION

The restriction requirement set forth in the office action of 6-9-05 is vacated and all of the claims (1-20) have been examined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Uetake (5,931,245) or Thompson (3,989,990).

Uetake teaches a drive means 18, a control means 26, an activating unit 23, and a voltage stabilizing means 24. Thompson teaches a drive means, a control means, and activating unit and voltage stabilizing means in the text of the abstract.

Allowable Subject Matter

Claims 2-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest the detailed limitations recited in the dependent claims that relate to the operation of a voltage stabilized power system for an electric vehicle.
